

# Virtual Programs

Group size: Up to 30 students

Length: 45 to 60 minutes

Fee: \$5 per student

The Flint Institute of Arts is pleased to offer virtual programs for PreK-12 classes. Our programs are designed to encourage active learning and engage students in careful observation and the development of critical-thinking skills. Each program includes three to five virtual sessions. **To schedule a program, please call the Education department at 810-237-7314 or email [education@flintarts.org](mailto:education@flintarts.org).**

## Animals — Grades K-4

This program focuses on realistic and abstract images of animals. Art projects include drawing an animal from observation and making an abstract collage using animal shapes.

## Portraits — Grades K-4

This program looks at portraits and how artists use the elements of art and details to tell us more about people than how they look. Art projects include using proportion and details, abstract portraits, and expressive portraits.

## Math & Art — Grades 5-12

Although art can seem to be random and spontaneous, many artists use math when planning and organizing their work. This program looks at how artists use math and challenges students to consider how they might use math when creating their own art.

## Science & Art — Grades 5-12

Jane Hammond began collecting images from scientific manuals, children's books, and books on puppetry and magic to use as subject matter in her work. This program looks at how Hammond uses these images to create art and challenges students to create art from images they select.

## Black Matters — Grades 9-12

Artist Matthew Owen Wead uses art to confront injustices in society and to remind everyone that Black matters. Students will view a series of woodcut prints by the artist and choose an artmaking activity to express their feelings and ideas after encountering Wead's work.
